IRON DOOR FEATURES

OPERABLE GLASS PANELS

Three cam latches open to allow complete access to both sides of the glass providing easy access for cleaning and ventilation.

LUXURIOUS GLASS

All Old Mobile Iron Doors come standard with energy efficient Insulated Water-cube glass.

DP 50 RATING

Each door has three sets of oversized heavy duty hinges for smooth operation and extra strength to meet DP-50 requirements

AIR-TIGHT SEAL

Six heavy duty iron latches ensure a tight seal between the operating glass panel and the door

HANDCRAFTED DESIGNS

5/8" scrollwork is handcrafted on each door to ensure a beautiful secure look.

MAHOGANY DOOR MAINTENANCE

FINISHING & MAINTENANCE INSTRUCTIONS

MATERIALS NEEDED

- BLP Jack Tar High Gloss Ext. Marine Spar Varnish
- 000 Steel Wool
- 180 Grit Sandpaper
- Minwax Stain or Equivalent
- High Quality Urethane Brush
- Natural brush for Stain
- Clean rags

FINISHING

1. Prep the door for staining by sanding it with 180 grit sandpaper. Always sand in the direction of the wood grain.
2. Wipe the door surface to remove dust.
3. Apply stain to all six sides (Front, Back, Top, Bottom, Side 1, & Side 2) of door and allow to dry completely.
4. Use a brush to apply the 1st coat of varnish to all six sides. Allow to dry.
5. Lightly buff with 000 steel wool and wipe to remove dust.
6. Apply 2nd, 3rd, and 4th coats of varnish, buffing with steel wool between each coat. (For high sun exposure elevations and dark stained doors a 5th coat is necessary)

MAINTENANCE

Doors need to be inspected 1-2 times a year and re-varnished (1 coat) at least every 2 years.

Dark stained doors and doors with high sun exposure need to be re-varnished every year).

- Clean surface of door unit.
- Lightly buff with 180 grit sandpaper or 000 steel wool.
- Wipe the door surface to remove dust.
- Use a brush to apply 1 coat of varnish to all six sides.

WHY IS MAINTENANCE ON A WOOD DOOR SO IMPORTANT?

Jemison's doors have been handcrafted to last for many years, but can only do so with a proper finish. Without a proper finish, the sun's ray and water are able to penetrate the wood which leads to damage such as splits, cracks, and warping. With **one hour of maintenance a year** you can properly maintain your door and keep it looking and functioning like new.

SIGNS THAT IT'S TIME FOR MAINTENANCE:

- FADING OR CHANGES IN THE COLOR OF THE DOOR'S FINISH
- HAIRLINE CRACKS IN THE DOOR'S FINISH
- DULL OR CHALKY APPEARANCE TO THE DOOR'S FINISH
- FLAKING OF THE DOOR'S FINISH
